DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 12, 2004 has been entered.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 109 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,593,130 issued to Hannson et al. (hereinafter, Hannson).

Hannson teaches a laminate comprising a first elastomeric layer 2, and a second elastomeric layer 3 (see column 2, lines 30-34). Hannson teaches the first and second elastomeric layers each have a recess formed therein (see figures 2 and 3). Hanson teaches the laminate structure comprises a flexible membrane therein (see abstract, column 1, lines 4-6).

Response to Arguments

Applicant's arguments with respect to claim 109 have been considered but are moot in view of the new ground of rejection.
